

BUILDING TECHNOLOGY DESIGN FOR THE FUTURE OF DEFENSE

**Independent Thinking. Complex
Projects. Mission Ready.**

The private defense industry is transforming at an unprecedented pace. AI, autonomous systems, advanced manufacturing, and secure digital operations are redefining the built environment.

PLANNET provides independent, experienced technology consulting for complex defense environments—helping organizations rapidly design secure, scalable, and adaptable facilities built to support today's missions and tomorrow's innovations.

Independent. Integrated. Proven.

Objective guidance, multidisciplinary expertise, and experience from more than 100 private defense industry engagements- helping organizations build technology infrastructure that performs today and scales for what's next.

The PLANNET Difference

- 1. Independent Advice-** Objective recommendations based solely on your operational requirements.
- 2. Integrated Expertise-** Communications, security, AV, wireless, and data infrastructure designed as one ecosystem.
- 3. Built for Complexity-** Trusted on over 100 private defense industry projects requiring multidisciplinary coordination and mission-critical performance.
- 4. Ready for Growth-** Scalable technology strategies designed to evolve with changing missions and expanding operations.

We Help Defense Organizations Make Decisions with Confidence

Reduced Project Risk

Early coordination minimizes redesign, conflicts, and costly change orders.

Faster Decision Making

Independent expertise helps organizations move quickly with confidence.

Future-Ready Infrastructure

Technology designed for expansion, modernization, and evolving mission needs.

Operational Readiness

Integrated systems that perform reliably from day one.

Our Approach

- **Understand**
Mission objectives first.
- **Plan**
Independent technology strategy.
- **Design**
Integrated infrastructure.
- **Coordinate**
Architecture + Engineering + Construction.
- **Deliver**
Operationally ready technology.

Testimonial

“Our partnership with PLANNET has been a critical factor in the successful delivery of numerous complex, time-sensitive projects. Their technical expertise and ability to maintain project momentum have made them a trusted extension of our team.”

Our services support scalable technology infrastructure that can adapt as missions change, teams grow, and operations expand.

- Mission-Critical Infrastructure
- Technology Strategy
- Technology Master Planning
- Infrastructure Assessments
- Standards Development
- Outside Plant
- Secure Network Infrastructure
- Construction Administration
- SCIF Design
- Technology/Server Rooms
- Data Centers
- Integrated Building Technology
- Structured Cabling
- Secure Wireless
- Audio Visual
- Hardened Physical Security
